# In work - Anmore.me Nostr Community Board

- Goal is to kill facebook community page
- Using NIP 5 verified priority, Feed sorted by highest Zaps
- Displayed on large display at coffeeshop, customers able to use their sats to boost posts or donate to local organizations
- Incentivizes posting quality content

# Roadmap

- Improve BTCNueServer plugin to be able to act as payout processor, to be able to send ecash tokens over email, not LNURL
- Develop a Wearable app that uses Bluetooth and nostr contacts so that kids, without internet can use it to pay for goods. Only POS needs to be Online
- Develop a Kid friendly app, on a cheap android device locked only to that app, for an ecash piggy bank.
